PhD CONSORTIUM

at the 16th East-European Conference on Advances in Databases and Information Systems
ADBIS'2012, Poznan, Poland, September 17-18, 2012

http://adbis.cs.put.poznan.pl/call_phd_consortium.php

ADBIS Ph.D. Consortium is a forum for Ph.D. students to present their research ideas, confront them with the scientific community, receive feedback from senior mentors, socialize and tie cooperation bounds. Students will receive support and inspiration from their peers, and they will enjoy the the opportunity to discuss their research and career objectives with senior members of the community from outside their institution. Students will present and discuss their research directions in the context of an established international conference outside of their usual university environment.

The event will consist of four sessions with presentations and panel discussions. These sessions are scheduled in parallel with workshop sessions affiliated with the ADBIS conference on the 17th of September. Each participant will be granted 20 minutes to present her/his research. In addition, a poster session will be held during the first day of the main conference, on the 18th of September. Each participant of the Ph.D. Consortium can present her/his research during the poster session, thus increasing the exposition of the research and engaging in conversation with senior members of the research community.

ELIGIBILITY

We seek Ph.D. student participants who have either determined the direction of their thesis research (probably with some preliminary results already published), but who still have substantial work to complete, or Ph.D. student participants who are in the early stages of their dissertation year. Please note that it is not required to have a paper accepted for the main conference in order to participate in the Ph.D. Consortium.

REVIEW PROCESS

Selection will be based on the clarity of the submitted materials and the student's stage of research. We will also take institutional representation into account in order to provide a truly diverse environment for research presentation and discussion. Applications not adhering to the provided guidelines (including page limits) will not be considered.

PROCEEDINGS

Presented papers will be published jointly with ADBIS' Workshop materials in a special issue of the Springer Advances in Intelligent and Soft Computing series. In addition, extended versions of accepted papers will be invited to appear in the special issue of the Foundations of Computing and Decision Sciences journal.

IMPORTANT DATES

- Submission :   June 10, 2012
- Notification: June 17, 2012
- Camera ready: July 1, 2012
- PhD Consortium: September 17-18, 2012

CONSORTIUM CO-CHAIRS

- Mikolaj Morzy, Poznan University of Technology, Poland
- Alexandros Nanopoulos, Catholic University of Eichstätt-Ingolstadt, Germany
